

AZURE - CREATING STORAGE

B.Bharani kumar

INT00875

1.Select > Storage accounts

2.Select > Create storage account

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo and a search bar. The main content area is titled 'Storage accounts' and shows a list of storage accounts. A message states 'No storage accounts to display' and provides instructions on how to create a storage account. The 'Create storage account' button is highlighted.

3.Put name and Select region

The screenshot shows the 'Create a storage account' wizard in the Microsoft Azure portal. The 'Basics' tab is selected, and the 'Storage account name' and 'Region' fields are filled out. The 'Storage account name' is 'bharanistorage' and the 'Region' is '(US) East US'. The 'Review' button is highlighted.

4.Change *(redundancy)>(Local redundancy) then go to Advanced

SquirrelMail 1.4.23 [SVN]-1.0 x Launch an instance | EC2 Ma x AZURE - OneDrive x Storage account_Josheena.d x Create a storage account - h x + - x

6.No need to change > Select Encryption

The screenshot shows the 'Create a storage account' wizard in the Microsoft Azure portal, specifically the 'Data protection' tab. The page is titled 'Create a storage account' and has a breadcrumb trail: Home > Storage accounts > Create a storage account. The tabs at the top are Basics, Advanced, Networking, Data protection (selected), Encryption, Tags, and Review. Under the 'Recovery' section, there are three options: 'Enable point-in-time restore for containers' (unchecked), 'Enable soft delete for blobs' (checked), and 'Enable soft delete for containers' (checked). The 'Days to retain deleted blobs' is set to 7. At the bottom, there are navigation buttons: 'Review' (highlighted), '< Previous', and 'Next: Encryption >'. A 'Give feedback' link is also present.

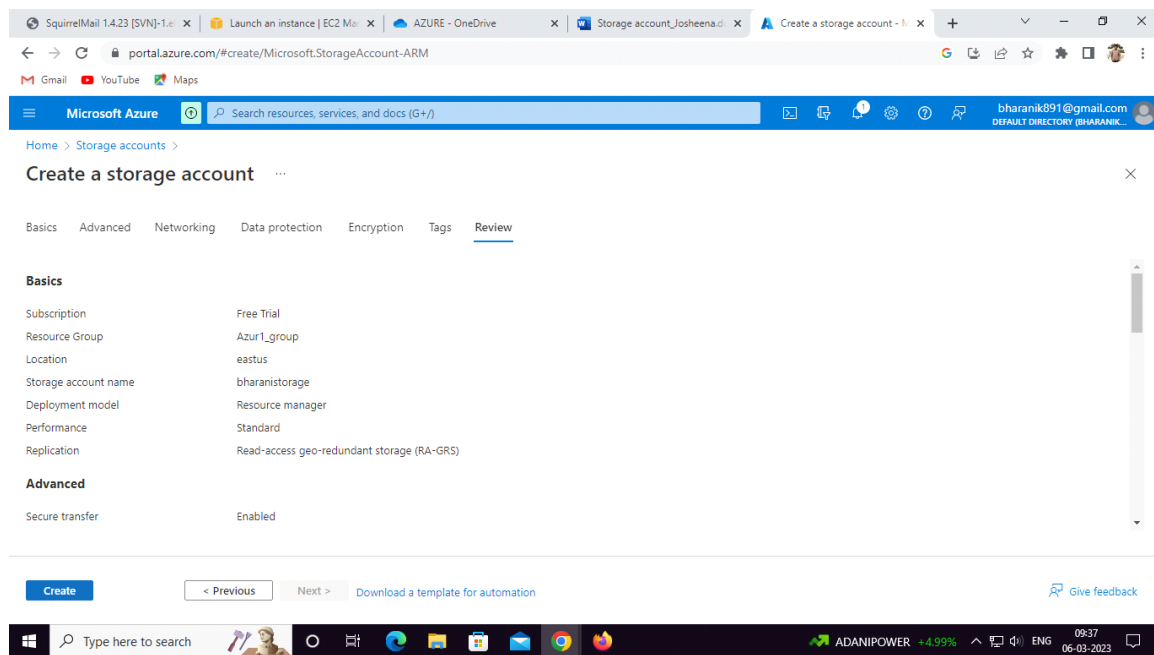

7.No need to change

This screenshot shows the same 'Create a storage account' wizard in the Microsoft Azure portal, but with different settings. The 'Data protection' tab is still selected. Under the 'Recovery' section, 'Enable point-in-time restore for containers' is now checked, while 'Enable soft delete for blobs' and 'Enable soft delete for containers' are unchecked. The 'Days to retain deleted blobs' remains at 7. The navigation buttons at the bottom are the same: 'Review' (highlighted), '< Previous', and 'Next: Encryption >'. A 'Give feedback' link is also present.

8.Change (blobs and files only) to (all service types (blobs,files,tables &queues))

9. Select create

10. Now deployment is completed > Select go to resource
